# FINANCIAL AND COMMERCIAI

also gained. There were slight advance in such specialties as Colorado Fue Pressed Steel Car and American Locamotive. Amalgamated Copper respond ed to buying by houses supposed trepresent Boston interests. The liftuctuated for a brief period, but short ly before the publication of the ban statement a heavy buying movemen set in. There was a lively demand for Union Pacific, Southern Pacific, Mississipport of the Control of the Cont souri Pacific, Southern Railway, Rock Island, Louisville & Nashville, Peni sylvania and others in the same group. London bought Union Pacific and Southern Pacific and the extensive pur-chases of Eric were probably for the account of the professional short in-The market remained active to the

close and prices of many issues were then the best of the day. The bank statement was regarded as May favorable in the sense that the loan decrease as well as the cash loss showed better than had been expected. An inspection of the daily report of

the associated banks reflects the recent sale of city bonds. Three banks which acted for the purchasers of these bonds—the National Bank of Commerce, Chase National bank and Fourth National bank, reported debit balances of more than \$21,000,000, while the Naa credit of over \$8,500,000. While the National City bank, a city depository, had a credit of over \$8,500,000. New high prices were registered by the steel issues. Atchison made a slight gain in spite of its poor October report. Great Northern preferred advanced 7 points, making a 17-point gain in two days. making a 17-point gain in two days.

Total bond sales today, par value, \$5,020,000.

## Review of the Week.

The most striking feature of the week was the heavy dealings, at increasingly high prices, of the securities of the United States Steel corporation. It is generally believed that some plan in-volving the futher conversion of Steel preferred into the sinking fund 5 per cent bond is contemplated. Evidence recumulated that the iron and stee the other highly speculative issues more than held their gains of the past week. The offerings of new issues of securities as exemplified in the sale of blocks in the Union Pacific, Rock Island, Chicago, Burlington & Quincy, Pennsylvania. Marquette refunding bonds and other less important issues revived discussion of refunding plan-long dormant and of consolidations of groups of subsidiary companies of som of the great railroad systems for con venience of financial policy.

This marks clearly the passing of th era of indigestion in the securities may ket which occasioned borrowings of enormous amounts by Pennsylvania New York Central and other powerful corporations during the course of las year, and for which high rates of in terest was paid. These berrowings wer made necessary to keep alive project already entered upon and which would have involved heavy losses by interrup-tions. The ready sale of these securities is perhaps the best evidence of the revival of confidence and of the ab sorptive power of the market which is entitled to the great encouragement which it occasions. But it will probably be availed of to a large extent t fund into the long term obligation many of the short term high-interes obligations of the character above in dicated, and which will hang over th market for occasional offerings in considerable amounts for a year to come

The effect of such expansion of the volume of securities to be markete even of the most highly priced securi ties, lies vividiy in the recollection, ever since the rescue of the Pennsylvania stocks offering from practical failure by the tardy formation of an under-writing syndicate. The prior clain which such securities are likely to as-sert on the future consideration of the market is taken account of by those who seek developments of the more re mote future.

Little Interruption. The holiday interruption of the wee caused but a slight dimunition in mar ket activity. Notwithstanding the long mmunity of the money market from the many drains upon the cash supplies, the rates of interest for the week have shown that the usual fall influences so are not to be wholly escaped. The de-So crease of over \$60,000,000 in the item of deposits of other banks reveals the source of the supply of stock market borrowing during the period from Sep-borrowing during the period from Sept. 9 to Nov. 10, while the ican item of the banks was actually contracting some \$20,000,000. Although the legal surplus of the banks is thus restricted. surplus of the banks is thus protected by the trust companies, the effect upon the ultimate reserves is of effect on sentiment and curbs the borrowing disposition in the conservative financial world.

Preferred .... Mex. Central ... So. Pac. ofd ... Adams Ex. ... Adams Ex. ... American Ex. [T. S. Ex. ... Welle-Farco Ex. Amal. Conver ... Amal. Conver ... Amal. Conver ...

It is noteworthy that the bank clearings all over the country show an increase of over 50 per cent compared with the same week last year. The eager demand of continental Europe for our gold yet remains undefined in its extent. It is expected also that the movement of the corn crop, although somewhat belated, will make large interior requirements when it develops. Beyond lie the year-end demands to be considered, and the influence of the release of funds after the turn of the year is to be modified by the call of the secretary of the treasury for surrende rof some \$10,000,000 of government deposits on Jan. 10. It has been quite confident-ly believed that the late movement in stocks has been based to an important extent on the extreme ease of the money market, and it was not supposed that any material cheek to the advance would be met unto the supply of loanable funds began to rise in Paris. The response of the week's market has partly served to corroborate this view.

United States 4 per cent coupon bonds advanced is per cent on call during the week. Republic Steel

## The Bank Statement.

New York, Nov. 26.—The statement of averages of the clearing house banks of his city for the five days of this week Loans, \$1,102,420,900; decrease, \$10,280,900, Deposits, \$1,144,212,500; decrease, \$15,665, Circulation, \$42,126,500; decrease, \$62,000. Legal tanders, \$76,476,400; increase

Reserve, \$234,434,560; decrease, \$5,960,600. Reserve, \$234,434,560; decrease, \$5,124,600. Reserve required, \$286,653,125; decrease Surplus, \$8,381,375; decrease, \$1,208,325. Ex. U. S. deposits, \$14,224,825; decrease,

Surplus, \$8.381.375; decrease, \$1.388.295.
Ex. U. S. deposits, \$14,225.255, decrease, \$1.20.675.
The Financier says: The official statement of the New York associated banks last week showed, as the most striking changes compared with the previous week, an important decrease in loans, though somewhat smaller than was expected. A loss of cash, closely corresponding with that which was indicated by the extimates that were based upon the known movements of money, a decrease in denosits by an amount very nearly agreeing with the sum of the reduction in loans and the loss of cash, and a decrease in surplus reserve to a little morthan \$1.000,000 below the amount at the beginning of the year. The loan contraction was \$10.289.800, making \$39.765,700 since Oct. 29, in which period there has been a buoyant speculation in the stock market, calling logically for expansion rather than contraction. It is quite likely, however, that the trust companies are carrying a larger volume of loans.

Loss of cash was \$1.124,600 net. or \$1.062. 300 less than the estimates, but the discrepancy was doubtless due to the system of bank averages and also to the inclusion in the estimates of withdrawals of gold for export which occurred on the last day of the previous bank week, and were then accounted for in the statement; the loss of cash reported by the banks makes a total since Oct. 29 of \$23,467,500. The deposits were decreased last week by \$15,600.00, making \$90,221,700 since the above mentioned date. Computed upon the bacis of deposits, less those of \$28.2573,500 public funds, the surplus spill size of the previous bank week, and were then accounted for in the statement; the loss of cash reported by the banks makes a total since Oct. 29 of \$23,467,500. The deposits were decreased last week by \$15,600.00, making \$90,221,700 since the above mentioned date. Computed upon the bacis of deposits, less those of \$28.2573,500 public funds, the surplus against general deposits a year ago was, if may be noted, \$81,225,200.

# GREAT SAVING IN FIRE INSURANCE

Better Rates for the People of Sall Lake.

DIFFERENCE MAY BE \$50,000

W

W

W

N

W

INSURANCE MEN DEMAND MORE WATER AND EQUIPMENT.

Karl A. Scheid, surveyor for Salt Lake of the Beard of Fire Underwriters of the Pacific, has made recommendations to Mayor Morris, which, if adopted in connection with the additional supply of water, will mean a saving of between \$50,000 and \$60,000 in fire insurance to the people of this city every year. To get at the facts in the case the mayor yesterday sent the following inquiry to

'Would you please inform me what effect, if any, you think the proposed plan for increasing the water supply and improving the distributing system

## of Salt Lake City would have on in-surance rates?" What Mr. Scheid Says.

To this query Mr. Scheid sent the following communication:

lowing communication:
To the Hon, Richard P. Mortis, Mayor, Salt Lake City, Utah:
Dear Sir-To your query of even date.
Gelivered this morning, I have given my undivided attention.
While I am unable on such short notice to give you as definite a reply to your query as may be desired, and indeed the exact percentage of decrease in insurance rates can not possibly be arrived at until improvements have been made and their practical utility tested. I have no hesitancy in assuring you that the recognition by underwriters of improved conditions will be a generous reduction. I have made a rough but conservative I have made a rough but conservative computation, based on the assumption rot only that water supply will be increased (and the increase maintained) fourfold, but that following recommendations for increasing the efficiency of water distribution and fire department will be adopted.

Recommendations by Insurance Men.

KARL A. SCHEID, Surveyor.

## How Money Will Be Saved

Under the system of credits in vogue among insurance men an increase in South Omaha, Nov. 26.—Cattle—Receipts, 30 would mean a reduction of 17% in the rates of insurance. The premiums paid on fire insurance in Salt Lake cows, and heiters, 2.250.3.40.

Hogs—Receipts, 5,200. Market, 5c higher. Heavy, 4.4504.57; mixed, 4.7044.75; light, 4.4504.55; pigs, 4.004.40; bulk of sales, 4.50

Sheen—Receipts, 5,200. The considerably more than this. But on the basis of \$39,000 the saving in a reduction of 17% in the credits for protection from 8½ to 30 would mean a reduction of 17% in the rates of insurance. The premiums paid on fire insurance in Salt Lake every year is not less than \$390,000. It may run considerably more than this. But on the basis of \$39,000 the saving in a reduction of 17% in the rates of insurance. The premiums paid on fire insurance in Salt Lake every year is not less than \$390,000. It may run considerably more than this. But on the basis of \$39,000 the saving in a reduction of 17½ in the rates would mean \$52,500. It will be noted, too, that Mr. Scheid says his figures are conservative.

Running mains through the center of the business blocks of the city with hydrants in the rear of the large buildings is understood to be one of the tems to be included in the improvement of the water mains provided for in the general scheme.

# NO SUBSTITUTE CAN EQUAL "METEOR" MADE COFFEE.

A maker of cereal coffee seems to be engaged in a profitable advertising stating that ordinary coffee is injurious, and offering his mixture as a substitute. No "mixture" can be satisfactory to the lover of coffee properly prepared, and no coffee can be rightly pre-

"METEOR" COFFEE PERCOLATOR The entire strength being extracted makes it the most

economical way of produc-ing healthful coffee. It is not boiled; it is distilled. There are numerous cheap imitations of the "METEOR" which have been by

ght out since this method became (popular; but in the "AETEOR" will be found the best of its kind, the product of MANNING, BOWMAN & CO., who have been in this line of manufacture for forty years. Their make bears the stamp "METEOR" on the bottom of each article. Let us
